CLIENT PROMISE

Every one of our clients is our first priority. You can count on us to provide responsive and knowledgeable support ALL the time, not just when it's time to renew your plan. From pressing issues to tiny questions, our whole team is always here to help.

SPECIALIZED TEAM

Servicing small, mid-size, and large businesses, our clients range from accounts with as few as two employees to groups insuring 500+ employees.

Our team will review, design, and implement an employee benefit plan to meet the specific needs of your business. We'll help streamline the complexities of employee benefits and give you a concise comparison of the most appropriate options so you can make an informed fact-based decision. What's more, we'll keep you up to date on the latest Affordable Care Act compliance provisions and regulations (and we'll guide you through them!).

Our talented team of insurance professionals have an average of 20+ years of industry experience, and currently administer 500 employer-sponsored benefit plans that generate in excess of \$50 million in annual premiums. We're also proud to provide our clients with responsive and knowledgeable customer service all year round, not just when it's time to select and/or renew your plan.

While **Blue Harbor Benefits** is based in the Baltimore metropolitan area, our clients are located nationwide. We are licensed throughout the United States and broker through all major insurance carriers. We encourage you to explore our website, read testimonials from our current clients, and learn how Blue Harbor Benefits can help change the way you apply employee benefits for the better.
